EDUCATION

Alexandria University, Faculty of Computing and Data Sciences
Bachelor's in Data Science

Alexandria, EG
June 2027

- Relevant Coursework: Machine Learning, Probability & Statistics, Discrete Mathematics, Data Visualization, Software Engineering, Design & Analysis of Experiment and Survey Methodology, introduction to AI

PROFESSIONAL EXPERIENCE

DEPI (Ministry of communication certification)

Alexandria, EG
October 2024 – May 2025

Data Science Trainee /Team leader

- Worked on hands-on projects involving web scraping, machine learning, and database management.
- Extracted and processed online data, applied AI/ML models for insights, and optimized data storage workflows.
- Gained practical experience in data collection, cleaning, Analytical skills, analysis, and visualization for real-world applications.

IoT Software & Hardware Engineering - Field Training

June 2025 – Aug 2025

- Completed a 7-week program covering embedded systems, cloud connectivity, and IoT architecture.

SKILLS

- Programming Languages:** Python, Java, SQL
- Data Science & Miscellaneous Technologies:** Data science pipeline (cleaning, visualization, modeling, interpretation), Statistics, Git, Analytical skills, analytical
- Big Data & Machine Learning:** AWS (EC2), ML (Scikit-learn), Logical reasoning , AI tools ,using Large Language Models, used multiple AI IDE (cursur , VS).
- Soft skills :** Communications, Online research, Constructive feedback, motivated.

PROJECTS

Sales Forecasting for Retail Store

Team Leader

June-2025

- Developed a high-precision end-to-end forecasting system.
- Evaluates the performance of each model and provides key metrics to help you choose the best one for your data, Analysis market, Predict, Trends, Seasonality, Holidays after 6 months.
- Skills:** leading a team of 3 to implement and deploy SARIMA, Prophet, and LSTM models via a Streamlit web dashboard, MLflow for experiment tracking, with python: pandas , visualization seaborn , plotly, Matplotlib.

Job-Market-Insights-analysis

June-2025

- Developed an interactive Streamlit job market analytics app for Egypt & Saudi Arabia, analyzing 8,000+ real-time job listings to uncover seasonal hiring trends and top 10 high-growth sectors.
- Automated data collection, scraping, and preprocessing. Created 12 interactive visualizations to highlight job distribution, top employers, job types, experience requirements, and market comparisons, Cleaned, transformed, and structured raw data to ensure accurate, reliable insights for users.
- Skills:** Python (Pandas, Regex, BeautifulSoup, SQL Server, Plotly, Matplotlib, Seaborn).

Capstone Project :IoT Smart Pet Care System

- Developed an automated pet feeding system using ESP32 (C++) integrated with IR sensors for Food detection and Water Level sensors for fluid monitoring.
- Implemented real-time communication between hardware and Supabase using MQTT (HiveMQ).
- I Designed a mobile interface using Flutter to visualize sensor data and control servo motors remotely.
- Skills:** ESP32, C++, MQTT, PlatformIO, Flutter, Supabase.

HONORS AND AWARDS

ECPC (certification)

Competitive programming

- placed in the **top 93** out of **146** competing teams of **5 university** passing all filtration rounds.

VOLUNTEER EXPERIENCE

Eahlashbab and Twaheed & Nour

Team leader

Alexandria, Egypt
April 2023 - June 2023

- Led Ramadan food distribution initiatives, coordinating volunteers and ensuring efficient operations, Communications and meal around 15 individuals in day.
- Managed younger volunteers, organized schedules, and oversaw meal delivery logistics.
